

JSC Belarusian Forest Company is an integrated sales center of timber and wood-based products, manufactured by enterprises of the Holding of woodworking industry companies. The Holding comprises 9 manufacturing enterprises, which produce sawn timber, plywood, particle and fiber-based boards. Three of them also offer laminate flooring. All factories are equipped with state of the art production lines from leading European manufactures. Laminate flooring complies with the norms of STB EN 13329-2013 and STB EN 14041-2013. All products are FSC certified.

Since 2005 JSC Belarusian Forest Company has been rendering brokerage service to customers, who have interest in the sale and purchase of round wood and sawn wood at the auctions, held by timber products section of OJSC Belarusian Universal Commodity Exchange.

Centralized management enables continuous control of product quality through the complete production cycle from logging to manufacturing and packaging of finished products and facilitates optimization of deliveries. Quality management system in manufacturing enterprises complies with requirements, set out in ISO 9001-2015.

JSC Belarusian forest company is dedicated to permanent improvement of the quality of its services and product diversification. Export growth and increasing our market's share are among our primary objectives and as of today we have customers in more than 40 countries worldwide, including the CIS, Western and Eastern Europe, Middle East, Canada and the USA.
